

## Technology at the forefront of Aviation Security...

Aircraft are designed to be mobile and as such, the aviation industry requires highly flexible, adaptable and mobile solutions in order to operate successfully. Global Elite Group has developed a highly versatile solution that addresses multiple needs at multiple levels in an airport environment. Whether it be for access control, baggage reconciliation, cargo tracing, catering tracking or conventional supply chain applications, SecurSwipe™ is a cost effective and reliable solution.

### APPLICATIONS

- Aircraft and Facility Access Control.
- Baggage Tracking and Reconciliation.
- Cargo Tracing and Reconciliation.
- Catering process Monitoring and Tracking.
- Asset Control and Accountability.
- Safety and Security Incident Reporting.
- Time and Attendance Recording and Reporting.

### CAPABILITIES

- Mag Stripe, Barcode and RFID reading capability.
- Real Time Data transfer through Wireless LAN (IEEE 802.11).
- Customizable data-base with automated reporting tools.
- User Friendly Interface with clear feedback.
- Rugged Hardware with ability to operate in harsh environments.

### ADVANTAGES

- Improved Aircraft Turnaround and Handling Performance.
- Enhanced Security Measures and Programs through real time database verification.
- Improved Regulatory Compliance.
- Advanced Data Accuracy and Business Analytics.
- Tracing and Investigative Tools.
- Vendor Performance Management and Service Level Agreement Monitoring.
- Reduction in Document Storage Costs.
- Environmentally Friendly.
